Desired position: Junior Frontend engineer (HTML coder)   Portfolio: https://nataliavozhdaeva.github.io/rsschool-cv/

SUMMARY

HTML, CSS, and Javascript developer with experience in OOP and the ability to deliver pixel-perfect and adaptive layouts. I have been developing since 2020. Have a bit of experience with React and Angular. Love coding, love work, and love to communicate.

I'm a quick learner, and have got high attention to detail. Adaptable, driven, and responsible.

SKILLS

1. HTML, CSS (Flex, Grid, SCSS), Javascript;
2. Gulp, webpack;
3. GIT, BEM, OOP;
4. Figma, Photoshop;

5. **Languages:**
6. English (B1, in progress), Russian (Native), Italian (A1);
7. Have high attention to detail and accuracy of work;
8. Adaptable, driven and responsible.

EXPERIENCE IN DEVELOPMENT

RSSchool, student   **December 2022 – present**

At present time I repeat HTML5 and CSS3 and javascript

- Renewed my portfolio according to school recommendation (in progress some js-features);

- Created the first task – PixelPerfect layout for landing (desktop version).

HTML-academy, student   **April 2022 – June 2022**

OOP, architecture patterns, class components, working with someone else's code.

I developed SPA with HTML&CSS from the academy. Realized:

- REST API;

- progressive loading;

- "shake effect" for interactive components when the server doesn't respond;

- adding and deleting comments;

- filter, sort, and user's rating;

- fixing the academy's code.

Rubius Academy, student   **February 2021 – April 2021**

Gulp, webpack, React, CRUD operations. Async server's work (fetch).

I created a landing for a Beauty salon (HTML, SCSS, JS, bootstrap). Realized:

- service's tabs switching (plugin, JS);

- modal window for order and photo's carousel (@fancybox, JS).

Also developed the CRM for the salon with React. | created an order form by myself. Realized:

- interaction with the server and choosing a service, date, and master.

- form for adding, deleting, and updating orders.

Tomsk State University of Control Systems and Radioelectronics, student   **January 2020 – March 2020**

HTML5 and CSS3, javaScript, jQuery;

Implementation of complex visual effects - parallax, animations. Getting experience in Canvas;

Creating by myself a landing for a store, using flexbox, transform, and javaScript.

WORK EXPERIENCE

Web Editor   **Jan '10 – May '11**

at media "Serebrianyi Coffee" and "Gubernia", Tomsk, Russia

There I prepared texts with CSS and HTML for publishing, took part in reviewing website pages and content, used HTML and CSS formatting texts for comfortable reading and SEO optimization, and added new page sections for advertisement and social banners.

Journalist and PR manager, Tomsk, Russia   **Apr '11 – Mar '22**

There I learned to work quickly and make decisions, trained in stress resistance (working on-air), and learned to ask questions and hear people. That's all about my soft skills, and I'm sure they are very strong now.

ABOUT ME

Have a degree in journalism. Began to be interested in programming at school, but at that time we had programming lessons just in a graduate year, and that wasn't enough to enter university. Studied myself and in 2020 understood that need a system education, and started courses.

Take part in the game "What? Where? When?" (something like "Jeopardy", but with the team), sort the garbage, inspired by pixel-perfect, which match from the first time, like knitting and cats.
